LifeQuality Jeweller

Guarding productivity

LifeQuality Jeweller is a smart air quality monitor with temperature, humidity, and CO_2 sensors. It helps evaluate air quality and its dynamics indoors — at home, in the office, at school, or at a production facility.
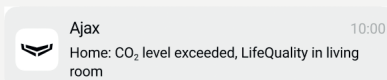

Key features

Detailed statistics in Ajax apps

LED indication
to inform of the CO_2 level

Remote control and configuration via Ajax apps

Automation scenarios

based on indicators

> Ajax   10:00
> Home: CO_2 level exceeded, LifeQuality in living room

Notification of indicators exceeding the set limits

Easy installation on any flat surface thanks to SmartBracket

Pairing with the system via the QR code

Up to 2.5 years
of operation on pre-installed batteries

Data-driven microclimate automation

LifeQuality Jeweller is a part of the Ajax ecosystem. It can interact with automation devices and trigger scenarios based on the indicators to control heating, ventilation, or appliances such as humidifiers.

Intuitive installation and connection

LifeQuality Jeweller is ready to operate straight out of the box. The installation does not require disassembling the enclosure. Ajax apps help to make the device a part of the system within seconds. Much of maintenance can be done remotely.
