

Tech specs

SUPERIOR

Superior MotionCam AM (PhOD) Jeweller

Wireless PIR motion detector with an anti-masking system and extended photo verification possibilities. Supports HD resolution.

Device compatibility

Check

Communication

Jeweller communication technology

Proprietary wireless communication technology to transmit commands, alarms, and events.

Key features:

- Two-way communication.
- Advanced sabotage protection.
- Block encryption featuring a dynamic key.
- Instant notifications.
- Remote control and configuration in Ajax apps.

Learn more 

Frequency bands

868.0–868.6 MHz

Maximum effective radiated power (ERP)

up to 20 mW

Automatic power control to reduce power consumption and noise interference.

Radio signal modulation

GFSK

Radio signal range

up to 1,700 m

Between the detector and a hub (or a range extender) in an open space.

Calculate the radio signal range at the facility ➤

Encrypted communication

All the data stored and transmitted are protected by block encryption with a dynamic key.

Frequency hopping

Radio communication uses frequency hopping to prevent interception and jamming.

Learn more ➤

💎 Wings communication technology

Proprietary wireless communication technology to transmit photo verifications.

Key features:

- Two-way communication.
- Block encryption featuring a dynamic key.
- Advanced sabotage protection.
- Reloading the data packages in case of transmission errors.
- Photo delivery check.

Detection

Sensitive elements

1 × PIR sensor

Motion detection distance

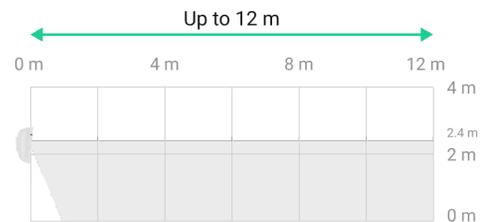

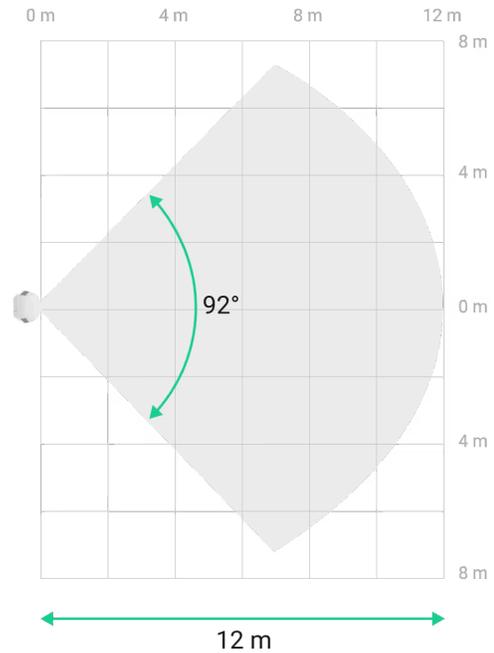

up to 12 m

When installed at a height of 2.4 m.

Reduced blind zone

from 80 cm

It detects a standing person at a distance of 80 cm from the device when the detector is properly installed at a height of 2.4 m. Does not depend on the sensitivity level. Testing was performed with a person of 175 cm height.

Crawling detection zone

from 2 m (TBC)

Detects a person crawling at a distance of 2 m from the device when the detector is properly installed at a height of 2.4 m. The test results may be updated.

Motion detection angles

horizontal: 92°

Motion detection speed

from 0.2 to 2.0 m/s

The direction of the detector sensors should be perpendicular to an alleged intrusion path into the facility.

Sensitivity

3 levels

Adjusted by a PRO or a user with admin rights in Ajax apps.

Temperature compensation

Effective motion detection at temperatures from -10 °C to +40 °C.

Learn more 

False alarm prevention

SmartDetect

Software algorithm.

Photo verification

Photo by alarm

A built-in camera is activated if the detector is armed and motion is detected.

Learn more 

Photo by tamper alarm

A built-in camera takes a photo if the tamper triggering is detected. The feature is disabled by default.

Photo by masking

A built-in camera takes a photo if the masking is detected. The feature is disabled by default.

Photo on demand

The user takes photos at any time or when the detector is armed (depending on settings). The feature is disabled by default.

Learn more 

Photo by scenario

The detector's camera takes photos automatically when other Ajax detectors are triggered. The feature is disabled by default.

Learn more 

Photo by schedule

The detector automatically takes photos at a specified time.

Learn more 

Photo by arming/disarming

The detector automatically takes photos when the security state is changed.

Learn more 

Adjustable photo resolution

960 × 720 px*

640 × 480 px(by default)

320 × 240 px

160 × 120 px

Adjusted by a PRO or a user with admin rights in an Ajax app.

* The firmware version confirmation is required. First photo delivery in 15.5 seconds with TurboWings protocol.

IR illumination

For photography at night and in low-light conditions.

Series of pictures

from 1 to 5 images with a resolution of 320 × 240 px or 160 × 120 px

from 1 to 3 images with a resolution of 640 × 480 px or 960 × 720 px*

Adjusted by a PRO or a user with admin rights in an Ajax app.

* The firmware version confirmation is required. First photo delivery in 15.5 seconds with TurboWings protocol.

Photo delivery time

up to 3 s – 160 × 120 px resolution

up to 4.5 s – 320 × 240 px resolution

up to 11 s – 640 × 480 px resolution

up to 15.5 s – 960 × 720 px resolution

Photo delivery time depends on the image resolution selected in the device settings.

Recommendations

It is recommended that the detector be installed at a height of 2.4 m.

The **pet immunity** feature is not available for this device.

The device is designed for indoor use only.

Sabotage protection

Tamper alarm

1 tamper

Notifications of attempts to detach the detector from the surface or unlock the SmartBracket and remove the detector from the mounting panel.

Learn more 

Protection against spoofing

device authentication

Anti-masking system

detects attempts to block the detector view

Learn more 

Communication loss detection

after 36 s

Detection time depends on the Jeweller/Fibra settings.

Power supply

Batteries

2 × CR123A

Pre-installed.

Type

Type C.

Calculated battery life

up to 4 years

With the **Photo on demand** feature disabled.

up to 3 years

With the **Photo on demand** feature enabled.

Learn more 

Detector's operating voltage range

4.2–6.2 V_{DC}

Detector's nominal operating voltage

6 V_{DC}

Quiescent detector's current consumption at nominal voltage

0.040 mA

Maximum detector's current consumption at nominal voltage

400 mA

Full capacity

3,300 mAh

Low battery voltage

4.85 V_{DC}

Low battery recovery voltage

4.9 V_{DC}

End-of-life battery voltage

4.2 V_{DC}

The device is switched off.

End-of-life battery capacity

600 mAh

Enclosure

Dimensions

134 × 70 × 59 mm

Weight

176 g

Operating temperature range

from -10 °C to +40 °C

Operating humidity

up to 75% non-condensing

Protection class

IP50

Color

White
