

**DS-KABB9703**

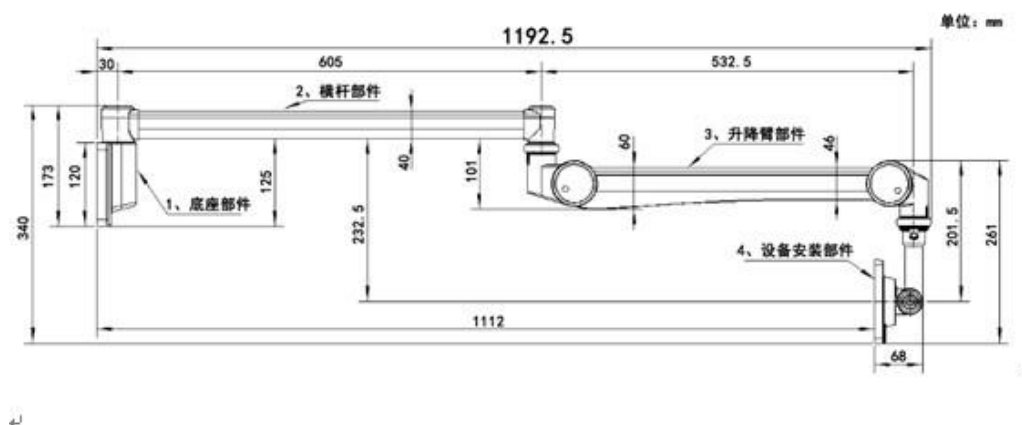

Bedside Medical Arm designed for mounting a bedside terminal, primarily serving as a cantilever for installation. It features an extendable arm, adjustable load capacity, multi-angle rotation, and a durable mechanical spring structure for smooth and stable adjustments.

- Bedside cantilever arm
- Arm reach up to 1.2 meters, load capacity 0-4 kg, two-section rotation, mechanical spring structure.

## ▪ Specification

Structural Parameters	
Colour	White
Material	Aluminium alloy, ABS plastic
Arm Length	1.2 meters
Load Capacity	0–4 kg
Rotation Structure	Two-section rotation, mechanical spring structure
Horizontal Arm Spatial Rotation	180 degrees
Pitch Angle	+60 degrees to -20 degrees
Arm Design	Horizontal, Curved design, aesthetically pleasing
Installation Parameters	
Tablet Mounting Hole	75×75 mm / 100×100 mm
Installation Method	Wall-mounted (using 4 screw holes for wall drilling installation)
Panel Handle	Configurable panel handle for ease of use
Wiring	Internal wiring holes, internal wiring

## ▪ Dimension
