Xtralis PIP-012 250ml Solvent Cement for ABS

Key Features

- Contains 250ml
- Separate COSHH statement available
- Intended usage; Jointing of pipework

Product Overview

Solvent cement welding is a simple and quick means of constructing high integrity leak free joints. Care must be used to ensure that the correct solvent cement is used and that joining instructions are followed properly. This specially formulated solvent cement is used with ABS pipe and fittings to join the surfaces together. The solvent cement melts the two surfaces to form a chemical weld when applied correctly between the fittings.

Main Features

- Contains 250ml
- Separate COSHH statement available
- Intended usage; Jointing of pipework
- ABS resin dispersed in Methyl Ethyl Ketone
- Shelf life; 12 months minimum
